## Breeding Future Champions

Our breeding philosophy utilises some of the principles of the great Federico Tesio who understood the importance of the transmission of genetic traits in reproduction. He placed the focus firmly on the breadth and depth of performance in families and reinforcement of dominant ancestors through careful line breeding.

**“A horse gallops with his lungs, perseveres with his heart,  
and wins with his character”**

Federico Tesio

(widely regarded as one of the most important breeders of thoroughbreds in history)

We believe that by breeding from families saturated with dam line performance in particular, there is a higher than average probability that their offspring will inherit the DNA for the physical and mental performance attributes because they have been shown to be reliably passed through the generations.

An analogy might be that by focussing on dam line performance in the mare and stallion we are in effect using two 'loaded' dice in our breeding programme – where the dice are pre-set to land showing the higher numbers of 4, 5 and 6 – increasing the odds of higher combined scores – or in breeding terms, increasing the probability that the DNA associated with these high-performance attributes is being passed to their offspring.

Our roster of stallions includes multiple award winning sires which have been used by knowledgeable breeders around the world including Queen Elizabeth II, and Olympians Laura Collett, Kristina Cook and Mary King. They descend from families that have won medals at the Olympic Games and World Championships, as well as CCI5\* winners.

Our stallions achievements include being Stallion Licensing Champions, International event horses, Dressage National Championship finalists, Young Event Horse finalists and Champion show horses. They have produced CCI4\* eventers and International FEI winners, Burghley Young Event Horse winners, HOYS Supreme Champions, National Dressage Champions, Sunshine Tour showjumping winners and National Futurity Champions.

Future Sport Horses is delighted to be able to offer a broad range of services so please do get in touch if you'd like to discuss potential breedings to our stallions, creating a custom embryo from our CCI5\* winning mares, investing in youngstock, or just generally finding out about our horses. Whatever your level of breeding knowledge, we're here to help!
